TESTIMONIAL

We thoroughly enjoyed working with Paul Gabauer to successfully complete the project at Upper Orara, featured on the cover of Grand Designs Australia 3.3. The project was completed in early 2012 and took approximately 11 months to build.

Paul and his team were fabulous to work with and their attention to detail, local knowledge and experience made the build on this project a smooth and easy collaboration. The clients are thrilled with the final product and their new home brings them enormous pleasure.

We would happily work with Paul again and recommend him to anyone thinking of building in this beautiful part of the world.
